DVR-117D
Internal DVD/CD Writer

DVD-R/RW, DVD+R/+RW, & CD-R/RW

(Available in beige and black)

<u>Product Overview</u>

The **DVR-117D** high speed DVD burner from Pioneer enables computer users to create personal DVD movies, make digital photo slideshows, burn music CDs and back up data files onto DVD-R, DVD-RW, +R and +RW discs with ease. It also works with dual layer discs, increasing the capacity of a disc from 4.7 to 8.5 gigabytes for even more storage space. The DVR-117D has a writing speed of **<u>20x</u>** for DVD-R/+R and <u>12x</u> for DVD-R/+R (DL).

- **Optimal Write Speed:** recognizes the disc media and automatically adjusts the drive's write speed to ensure the highest quality digital preservation of vital files

- **Quiet Drive:** the internal mechanisms of the drive were redesigned to better insulate the distracting noise generated by a disc spinning at extremely fast rotations per minute (RPM). The unique interlocking design ensures a low acoustic noise by "trapping" the airflow noise generated by the spinning disc while simultaneously dampening the sounds created by normal drive usage

- **Improved Durability:** Through the new Anti-Dust design, an improved chassis insulation aids in the protection of the drive's internal components from dust and small particles that can hinder the drive's operability and lifespan
